

Given Tshuma

Junior Mechanical Engineer

Resume Objective

I'm a junior mechanical engineer with over 2 years of experience working within the petrochemical industry and over 3 years developing android apps. This time included conducting my own side projects either for myself or clients. I'm currently seeking for opportunities to work professionally as a software developer.

Experience

Junior Mechanical Engineer

Astron Energy Pty Ltd / January 2019 – Present

- Conduct minimum thickness evaluations using *PVElite*, *NozzlePro* and apply methods specified in the ASME VIII Pressure vessel design code.
- Liaise with external companies to outsource work and ensure the team isn't being too loaded.
- Resolve queries from various parties involving pressure vessel repair or maintenance work.
